The tagline for Lineberger Orthodontics is “Smile On”—and that’s precisely what their patients do with confidence. It’s the mission of Drs. Matt and Megan Lineberger and their team to provide stunning smiles while offering the most advanced and caring orthodontic experience.

The Linebergers practice innovative treatment in two state-of-the-art facilities—their Huntersville office and their recently opened office in the Elizabeth neighborhood. Their goal for both locations: to guarantee that their patients’ battle against “crooked” is as pleasant and efficient as possible. The practice offers the advantage of a board-certified husband-and-wife team that provides two experienced sets of eyes and minds to come up with a careful and thoughtful custom treatment plan.

The Linebergers’ cutting-edge care includes multiple digital scanners in each office that capture teeth in three dimensions. This technology not only makes Lineberger Orthodontics an “impressionless” practice, but also allows patients to see their enhanced smile before treatment even begins.

Treatment plans are digitally customized to

your specific facial characteristics and smile. Invisalign aligners or Damon braces, chosen by you, are used to execute the smile enhancement. The doctors are proud that Lineberger Orthodontics has been one of the leading Invisalign providers in both North Carolina and South Carolina the past two years.

For those who want treatment to progress as quickly as possible, the practice offers AccelDent, a soft-pulse medical device that gently accelerates the movement of teeth.

A comfortable, interactive waiting room, complete with massage chairs, a Starbucks coffee machine and fresh baked cookies, is another example of the practice’s commitment to stellar patient service. The Linebergers—who recently became a family of five with the birth of Millie (proud siblings are Mason 5, and Mia, 3)—continue to strive to be community- and philanthropy-centered while making orthodontics a possibility for all.

“Whether it’s a good day or a bad day,” Dr. Megan says, “we want to give our patients that spectacular grin that allows them to pick their head up and ‘Smile On’—no matter what life throws at them.”
